

The Visual Analyzer Module

The Visual Analyzer module for Sage MIP Fund Accounting is a business intelligence (BI) tool, or technology that accesses and converts data into meaningful information. The objective of the Visual Analyzer is to improve the speed and quality of decision-making. It provides available, up-to-the-minute information about key performance metrics, enabling users to take a logical approach to decision-making and problem solving.

Monitor Organizational Performance

The Visual Analyzer provides a graphical, interactive approach to financial data analysis. You can find answers to a variety of questions with the technology to access and monitor information within a department or across your organization. With precise, up-to-date information, staff can develop effective responses that help meet organizational goals. With financial dashboards, you have access to the data you need to make tactical and strategic decisions in a timely manner. The dashboards help you to use information effectively in order to deliver on your mission, show accountability, and win the competition for grant and contribution dollars.

Quickly uncover trends, monitor cash balances, and track spending throughout your organization. The business intelligence tool allows you to identify risks, develop effective strategies and make timely, informed decisions. The guesswork of these impactful steps is side-stepped with the ability to drill down into data, directly in the graphs and charts. Advanced filtering and cross-year reporting enable you to choose exactly what information is portrayed on your dashboard.

Improve Accountability

You have direct, easy access to real-time data displayed in visual, graphic representations, so you can easily monitor program spending ratios and track program efficiency. This allows for the information to be easily communicated, understood and valued throughout an organization. It also supports your effort to demonstrate the value your organization provides to your constituents, leading to more transparency for your funding sources.

The visual, interactive dashboard interface enables non-technical users to query data, make more sophisticated analysis, and disseminate key information throughout the entire organization. With deeper insight, nonprofit and government professionals can strengthen accountability, improve agility, and ultimately secure the success of their organization.

DASHbOArDS INCluDe

- Performance Monitoring—budget and trend analysis
- Financial Analysis—net assets and cash analysis
- Revenue Analysis—vendor and expenditure analysis

End-to-end solutions. Expert advice. Ongoing support. That's Sage 360®.
